OOM for 2023 and beyond

## Structure of the 2023 OOM

The OOM will be utilizing a points-based system to rank players. The Power of the event will determine the "Rank" of the tournament and the corresponding points breakdown. The Power is determined by the World Amateur Golf Ranking (WAGR).

ALL players will be taken into account. Those without WAGR ranking will still be ranked according to the points breakdown:

For example, the 2022 SEA Games has a Power of 215. This puts the event at "D" rank. Player A finished $3^{\text {rd }}$ among all players and Player B (who does not have a WAGR rank) finished $12^{\text {th }}$ among all players.

Player A's points - 1400
Player B's points - 400

## Divisors

Divisors will also be included in the rankings. Each tournament will have one divisor, regardless of rounds played and in which format. Exceptions are:

1. Team events, like the Palmer Cup and Junior Ryder Cup. There will be no points and no divisor added.

Each player will be given a minimum of 3 divisors at the start of the year.
However, to be considered for SGA OOM Awards \& KPIs, a player needs to play a minimum of 7 tournaments/divisors for the Open division and a minimum of 5 tournaments/divisors for Under 17 division. There will be no maximum divisor.

## Professional events

All professional events will be ranked according to their Power as well.

## Ties

For ties, all points that would have been awarded accordingly will be pooled and divided equally among those who are tied.

For eg, in a ranked F event, Player A, B and C finished tied for $2^{\text {nd }}$. Based on the points breakdown provided, we will pool points awarded for $2^{\text {nd }}(500), 3^{\text {rd }}(350), 4^{\text {th }}(250)$ and divide it by 3.
$500+350+250=1100 / 3=366.67$ (rounded up to 2 decimal points) will be awarded to all 3 players.
In the event that a player is tied in a position that does not give points past a certain position, the points given for the final position will be applied.

- For eg, in a Rank F event, the last position that gets points is $10^{\text {th }}$. If Player A is tied $9^{\text {th }}$ with 3 others, the following calculation will occur:
- 160 (Player A) $+150+150+150=690 / 4=152.5$ will be awarded to all eligible players.

## Withdrawals and Disqualifications

A player will be assessed one divisor and no points if they withdraw or are disqualified AFTER they have teed off. No divisor will be given if they have not teed off.

However, if a player plays in a Rank A, B or C event, and they withdraw or are disqualified after making the cut, they will be assessed last place points and one divisor.
